

Where Your Heart Is

For 2 Part Voice with Piano Accompaniment

Music and Lyrics by
James O. Lockett

WHERE YOUR HEART IS, is a warm, lovely piece for Children's Chorus. The message of the song is that you don't need to look outside yourself for love, inspiration, motivation or belief. If you look inside, you'll find it's been right there all along. The first half of the piece uses unison/octave voice only and can be performed separately by stopping at the double bar. It can also be performed as a round. The second half brings in a counter line with Voice 2. Both parts can be doubled at the octave. The lines are easy to learn and very singable by a young, early-intermediate chorus. The harmonies are interesting but not distractingly difficult. WHERE YOUR HEART IS, is fun to sing and an enjoyable experience for the listener.
